

Brief Introduction

I. Main Content

Data in this chapter mainly show the development of foreign economic relations and trade in Beijing, including foreign trade, use of foreign capital, and foreign economic cooperation in Beijing over the years.

II. Scope of Statistics

(I) Statistics for Imports and Exports of Goods

The scope of statistics for imports and exports of goods covers all imports and exports that lead to increase or decrease in the stock of physical resources at Beijing customs, except for those otherwise stated in regulations, and the survey was conducted with comprehensive survey method. Data mainly include: total value of imports and exports in Beijing, and quantity of imports and exports of major products, and so on.

(II) Statistics for Port Operation

The statistical scope of port operation covers the Port of Beijing Capital International Airport, the Port of Daxing International Airport, Beijing Fengtai Cargo Transport Port, Beijing Chaoyang Transport Port, Railway Port at Beijing West Railway Station, Beijing Pinggu International Land Port, and Beijing Tianzhu Comprehensive Bonded Zone. Data mainly

include: passenger throughput, cargos carried, quantity of cargos under regulation and duties levied.

(III) Use of Foreign Capital

The scope of statistics for the use of foreign capital refers to foreign investment, including the investment made by natural persons, enterprises or other organizations of foreign countries or Hong Kong, Macao and Taiwan regions, in the ways such as establishing foreign invested enterprises within the territory of China, acquiring shares, equity, property shares or other similar rights and interests in Chinese domestic enterprises, establishing branches of overseas banks and overseas insurance companies, and development of oil and gas.

(IV) Foreign Economic Cooperation

Statistics cover foreign labor service enterprises with legal person statues that are engaged in foreign contracting, labor service cooperation and design consulting with approval from departments of commerce at different levels. The survey was conducted with comprehensive survey method. Data mainly include: foreign contracting projects, labor service cooperation and design consulting.
